AI-Powered Pest Detection and Intelligent Irrigation System Feb 2025 – Jan-2026

| **AI, Python, C, Deep Learning, IoT, ESP32**

- Built an **AI-based pest detection system** using **Ultralytics YOLO and OpenCV** for real-time crop monitoring.
- Integrated **IoT sensors with ESP32** to collect environmental data including temperature, humidity, and soil moisture.
- Developed an **automated irrigation system** that controls water supply based on sensor data to optimize agricultural efficiency.
- Improved crop protection and reduced water wastage through **precision agriculture techniques**.

EXPERIENCES

Tap Academy Jan 2026 – Jun 2026
Full Stack Developer Intern *Bangalore, India*

- Trained in **Java Full Stack Development** including HTML, CSS, JavaScript, React, Spring Boot, Hibernate, and MySQL.
- Developed **dynamic web applications** integrating frontend interfaces with backend services.
- Implemented **REST APIs, CRUD operations, and database connectivity** for scalable application development.

ACHIEVEMENTS

Programming in Java – NPTEL (Elite Silver, 83%) – National Programme on Technology Enhanced Learning.

Solved **1000+ coding problems** on TAI Portal – Tap Academy.
